

Enhancing Research and Innovation through #ERAHubs

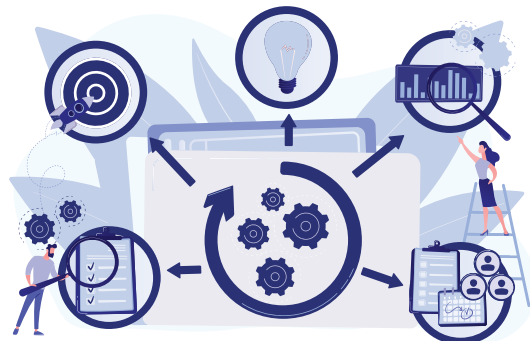

ERA_FABRIC, funded by Horizon Europe, is dedicated to creating ERA Hubs that foster collaboration and innovation across European regions. The project integrates research, innovation, and policy to address regional and societal challenges.

ERA Hubs Objectives

- Translate R&I results into the economy
- Strengthen innovation ecosystems
- Promote regional innovation and connectivity
- Encourage the creation of innovation-intensive sectors
- Enhance technology profiles and knowledge transfer

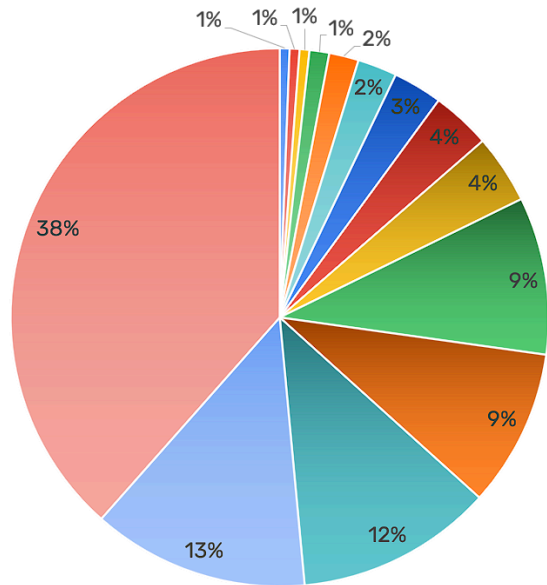

ERA Hubs as knowledge-based ecosystems are examined through various case studies from across Europe. These studies highlight key elements like goals, types of partners, roles of public administrations, and the balance between public and private sectors. Learning from real-world examples, this research helps create better tools for decision-makers to understand and manage these hubs within European policies.

POLICY CONTEXT AND GOVERNANCE

Fundamental principles underpinning ERA Hubs a successful implementation

- **Directionality:** Align public and private stakeholders around shared goals (e.g., Green Deal, digital transition).
- **Multi-Level Governance:** Engage regional, national, and European levels for comprehensive collaboration.
- **Horizon Integration:** Facilitate cross-border collaboration and knowledge exchange.
- **Holistic Approach:** Promote co-creation and joint ownership among all stakeholders.

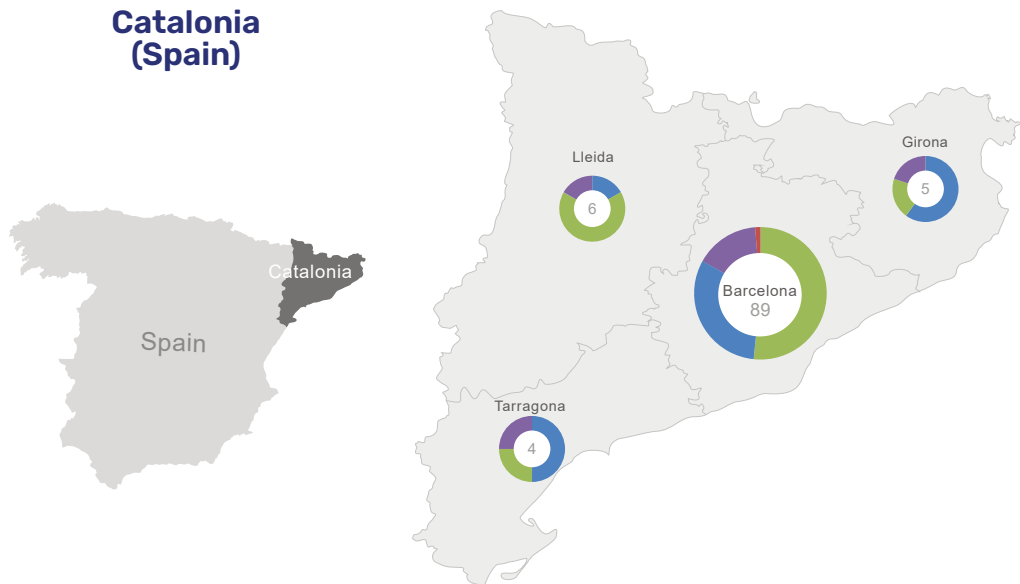

Importance of Multi-Level Governance

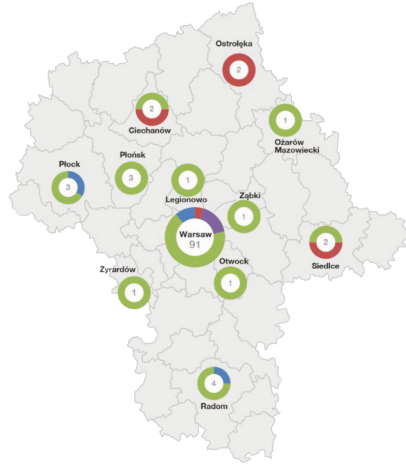

- **Engagement and Collaboration:** Continuous, inclusive stakeholder discussions.
- **Policy Alignment:** Harmonized policies at all governance levels.
- **Resource Allocation:** Coordinated funding for impactful innovation projects.
